How did the Fund perform during the reporting period?

The performance of the Fund over the last year was driven by a good environment for credit and a choppy rate environment. We allocated to bank loans and high yields for the majority of the period and were able to take advantage of the sanguine risk environment. We had a number of shorter-term signals where we implemented defensive measures to a portion of the portfolio and moved to near cash positions.

During the fiscal year ended June 30, 2024, the performance of the Fund did not deviate from managers expectations. The Fund is designed to produce income and perform in all economic environments.

How has the Fund performed since inception?

The Fund's past performance is not a good predictor of how the Fund will perform in the future. The graph and table do not reflect the deduction of taxes that a shareholder would pay on fund distributions or redemption of fund shares.
