This Prospectus provides important information about the Fund that you should know before investing. Please read it carefully and keep it for future reference.

These securities have not been approved or disapproved by the Securities and Exchange Commission nor has the Securities and Exchange Commission passed upon the accuracy or adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

Shares of the Fund are listed and traded on the NYSE Arca.

Beginning on January 1, 2021, as permitted by regulations adopted by the SEC, paper copies of the Funds' shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Funds' website www.inspireinvesting.com, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Funds electronically or to continue receiving paper copies of shareholder reports, which are available free of charge, by contacting your financial intermediary (such as a broker-dealer or bank).

FUND SUMMARY - Inspire International ESG ETF

Investment Objective: The Inspire International ESG ETF (the “Fund”) seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Inspire Global Hope ex-US Index (“Large Cap Index”).

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. Investors purchasing or selling shares of the Fund in the secondary market may be subject to costs (including customary brokerage commissions) charged by their broker. These costs are not included in the expense example below.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.45%
Distribution and Service (12b-1) Fees	None
Other Expenses ⁽¹⁾	0.35%
Total Annual Fund Operating Expenses	0.80%

(1) Estimated for the current fiscal year.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>
\$82	\$255

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. The Fund has not commenced operations as of the date of this prospectus.

Principal Investment Strategies: The Fund generally will invest at least 80% of its total assets in the component securities of the Inspire Global Hope ex-US Index (the “Index”), a rules-based index. The index provider selects foreign (including emerging markets) and domestic equity securities from all publicly traded international and emerging market large cap companies using the index provider’s Inspire Impact Score®, a proprietary selection methodology that is designed to assign a score to a particular security based on the security’s alignment with biblical values and the positive impact that company has on the world through various environmental, social and governance criterion. The Fund holds a representative sample of the securities that make up the Index.

The methodology removes from the investment universe the securities of any company that has any degree of participation in the following activities that do not align with biblical values, which are:

- abortion;
- gambling;
- alcohol;
- tobacco;
- pornography;
- the LGBT lifestyle; and
- rights violations such as association with or doing business in terrorist sponsoring countries, countries having oppressive systems of government, and countries where there are known human rights violations related to the persecution or severe discrimination against Christians, and poor labor practices.

The methodology then assigns a positive score based on whether the company has publicly available policies and procedures regarding involvement in activities that align with the following biblical values separated by category:

- Products and services (curing or treating disease; enhancing educational opportunities; providing food, water, shelter, clothing and sanitation for the poor and marginalized; and, providing Christian-themed products or services);
- Workplace (encouraging more time with family; providing above average compensation when compared to industry peers; providing above average employee benefit packages when compared to industry peers; and providing a safe and healthy workplace environment);
- Community (benefit the communities in which they do business through philanthropy and volunteerism); and
- Environment (protect and preserve the environment).

The index provider relies exclusively on software that analyzes publicly available data relating to the primary business activities, products and services, philanthropy, legal activities, policies and practices when assigning Inspire Impact Scores to a company. The 200 securities with the highest Inspire Impact Scores are included in the Index and are equally weighted. The Index will typically be comprised of 80% in developed foreign securities, and 20% in emerging market securities. The Inspire Impact Scores of the securities in the Index are reviewed periodically (at least annually), and the Index is rebalanced quarterly. If, upon review, the Inspire Impact Score of a security is negative, the security is removed from the Index and replaced with a positive scoring security.

The equity securities included in the Index are typically foreign securities of companies with capitalization of \$5 billion or more. The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Index concentrates in an industry or group of industries. The adviser is also the index provider.

Principal Investment Risks: *As with all funds, there is the risk that you could lose money through your investment in the Fund. Many factors affect the Fund's net asset value and performance.*

The following describes the risks the Fund bears with respect to its investments. As with any fund, there is no guarantee that the Fund will achieve its goal.

Asset Class Risk. Securities in the Large Cap Index or in the Fund's portfolio may underperform in comparison to the general securities markets or other asset classes.

Authorized Participant Risk. Only an Authorized Participant ("AP") may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as APs on an agency basis (*i.e.*, on behalf of other market participants). To the extent that APs exit the business or are unable to proceed with creation or redemption orders with respect to the Fund and no other AP is able to step forward to create or redeem Creation Units, Fund shares may be more likely to trade at a premium or discount to net asset value and possibly face trading halts or delisting. AP concentration risk may be heightened for exchange-traded funds ("ETFs") that invest in non-U.S. securities or other securities or instruments that have lower trading volumes.

Biblically Responsible Investment Risk. The Fund invests at least 80% of its assets in the component securities of the Index which uses the Inspire Impact Score(R) and related biblical values screening criteria in selecting its component securities. As a result of its strategy, the Index's exclusion of securities of certain issuers for nonfinancial reasons may cause the Fund to forgo some market opportunities available to funds that do not use these criteria. This could be due to biblically responsible companies falling out of favor with investors or failing to perform as well as companies that do not receive a favorable Inspire Impact Score(R).

Concentration Risk. The Fund may focus its investments in securities of a particular industry to the extent the Large Cap Index does. Economic, legislative or regulatory developments may occur that significantly affect the industry. This may cause the Fund's net asset value to fluctuate more than that of a fund that does not focus in a particular industry.

Early Close/Trading Halt Risk. An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may prevent the Fund from buying or selling certain securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and may incur substantial trading losses.

Emerging Markets Risk: Investing in emerging markets involves not only the risks described below with respect to investing in foreign securities, but also other risks, including exposure to economic structures that are generally less diverse and mature, and to political systems that can be expected to have less stability, than those of developed countries. The typically small size of the markets of securities of issuers located in emerging markets and the possibility of a low or nonexistent volume of trading in those securities may also result in a lack of liquidity and in price volatility of those securities.

Equity Securities Risk. Fluctuations in the value of equity securities held by the Fund will cause the net asset value (“NAV”) of the Fund and the price of its shares (“Shares”) to fluctuate.

- **Common Stock Risk.** Common stock of an issuer in the Fund’s portfolio may decline in price if the issuer fails to make anticipated dividend payments. Common stock will be subject to greater dividend risk than preferred stocks or debt instruments of the same issuer. In addition, common stocks have experienced significantly more volatility in returns than other asset classes.
- **Preferred Stock Risk.** Generally, preferred stockholders (such as the Fund) have no voting rights with respect to the issuing company unless certain events occur. In addition, preferred stock will be subject to greater credit risk than debt instruments of an issuer, and could be subject to interest rate risk like fixed income securities, as described below. An issuer’s board of directors is generally not under any obligation to pay a dividend (even if dividends have accrued), and may suspend payment of dividends on preferred stock at any time. There is also a risk that the issuer of any of the Fund’s holdings will default and fail to make scheduled dividend payments on the preferred stock held by the Fund).

ETF Structure Risk: The Fund and each Underlying Fund is structured as an ETF and as a result is subject to the special risks, including:

- **Not Individually Redeemable.** Shares are not individually redeemable to retail investors and may be redeemed only by the ETF only to Authorized Participants (“APs”) at NAV in large blocks known as “Creation Units.”. An AP may incur brokerage costs purchasing enough Shares to constitute a Creation Unit.
- **Trading Issues.** An active trading market for the Shares may not be developed or maintained. Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange. If the Shares are traded outside a collateralized settlement system, the number of financial institutions that can act as APs that can post collateral on an agency basis is limited, which may limit the market for the Shares.
- **Market Price Variance Risk.** The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a “bid-ask spread” charged by the exchange specialists, market makers or other participants that trade the particular security.
 - In times of market stress, market makers may step away from their role market making in the Shares of ETFs and in executing trades, which can lead to differences between the market value of Shares and an ETF’s NAV.
 - The market price of the Shares may deviate from an ETF’s NAV, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Shares than an ETF’s NAV, which is reflected in the bid and ask price for Shares or in the closing price.
 - When all or a portion of an ETFs underlying securities trade in a market that is closed when the market for the Shares is open, there may be changes from the last quote of the closed market and the quote from an ETF’s domestic trading day, which could lead to differences between the market value of the Shares and an ETF’s NAV.
 - In stressed market conditions, the market for the Shares may become less liquid in response to the deteriorating liquidity of an ETF’s portfolio. This adverse effect on the liquidity of the Shares may, in turn, lead to differences between the market value of the Shares and an ETF’s NAV.

Foreign Securities Risk: Foreign companies are generally not subject to the same regulatory requirements of U.S. companies thereby resulting in less publicly available information about these companies. The lack of readily available publicly available information may lead to inaccurate Inspire Impact Scores. Not all countries and jurisdictions monitor or regulate all ESG factors so that there may be no relevant information available for certain factors. In addition, foreign accounting, auditing and financial reporting standards generally differ from those applicable to U.S. companies.

Limited History of Operations Risk: The Fund is a new ETF with a limited history of operations for investors to evaluate.

Market Risk. Overall stock market risks may affect the value of the Fund. Factors such as domestic economic growth and market conditions, interest rate levels and political events affect the securities markets.

Passive Investment Risk. The Fund is not actively managed and the adviser will not sell shares of an equity security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the Large Cap Index or the selling of shares of that security is otherwise required upon a rebalancing of the Index as addressed in the Large Cap Index methodology.

Sampling Risk. The Fund's use of a representative sampling approach, if used, could result in its holding a smaller number of securities than are in the Large Cap Index. As a result, an adverse development with an issuer of securities held by the Fund could result in a greater decline in NAV than would be the case if the Fund held all of the securities in the Large Cap Index. To the extent the assets in the Fund are smaller, these risks will be greater.

Small and Medium Capitalization Risk: The stocks of small and medium capitalization companies involve substantial risk. These companies may have limited product lines, markets or financial resources, and they may be dependent on a limited management group.

Tracking Error Risk. Tracking error is the divergence of the Fund's performance from that of the Large Cap Index. Tracking error may occur because of imperfect correlation between the Fund's holdings of portfolio securities and those in the Large Cap Index, pricing differences, the Fund's holding of cash, differences on timing of the accrual of dividends, changes to the Large Cap Index or the need to meet various regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Large Cap Index does not.

Performance: Because the Fund has only recently commenced investment operations, no performance information is presented for the Fund at this time. In the future, performance information will be presented in this section of the Prospectus. Also, shareholder reports containing financial and performance information will be mailed to shareholder semi-annually. Updated performance information will be available at no cost by visiting Inspireinvesting.com or by calling 877.658.9473.

Investment Adviser: CWM Advisors, LLC dba Inspire (the "Adviser").

Portfolio Managers: Robert Netzly, CEO of the Adviser, and Darrell Jayroe, CFA®, Portfolio Manager of the Adviser have each served the Fund as a portfolio manager since it commenced operations in October 2019.

Purchase and Sale of Fund Shares: The Fund will issue and redeem Shares at NAV only in large blocks of 50,000 Shares (each block of Shares is called a "Creation Unit") to APs who have entered into agreements with the Fund's distributor. Creation Units are issued and redeemed for cash and/or in-kind for securities. Individual Shares of the Fund may only be purchased and sold in secondary market transactions through a broker dealer. Except when aggregated in Creation Units, the Shares are not redeemable securities of the Fund.

Shares are listed for trading on the Exchange and trade at market prices rather than NAV. Shares may trade at a price that is greater than, at, or less than NAV.

Tax Information: The Fund's distributions generally will be taxable as ordinary income or long-term capital gains. A sale of Shares may result in capital gain or loss.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

INVESTMENT OBJECTIVE:

Fund	Investment Objective
Inspire International ESG ETF	seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Inspire Global Hope ex-US Index.

The Fund's investment objective may be changed by the Board of Trustees upon 60 days' written notice to shareholders.

PRINCIPAL INVESTMENT STRATEGIES:

The Fund generally will invest at least 80% of its total assets in the component securities of the Inspire Global Hope ex-US Index (the "Index"), a rules-based index. The index provider selects foreign (including emerging markets) and domestic large capitalization equity securities from all publicly traded international and emerging market large cap companies using the index provider's Inspire Impact Score®, a proprietary selection methodology that is designed to assign a score to a particular security based on the security's alignment with biblical values and the positive impact that the company has on the world through various environmental, social and governance criterion. The Fund holds a representative sample of the securities that make up the Index.

The methodology removes from the investment universe the securities of any company that has any degree of participation in the following activities that do not align with biblical values:

- abortion;
- gambling;
- alcohol;
- tobacco;
- pornography;
- the LGBT lifestyle; and
- rights violations such as association with or doing business in terrorist sponsoring countries, countries having oppressive systems of government, and countries where there are known human rights violations related to the persecution or severe discrimination against Christians, and poor labor practices.

The methodology then assigns a positive score based on whether the company has publicly available policies and procedures regarding involvement in activities that align with the following biblical values separated by category:

- Products and services (curing or treating disease; enhancing educational opportunities; providing food, water, shelter, clothing and sanitation for the poor and marginalized; and providing Christian-themed products or services); Workplace (encouraging more time with family; providing above average compensation when compared to industry peers; providing above average employee benefit packages when compared to industry peers; and providing a safe and healthy workplace environment);
- Community (benefit the communities in which they do business through philanthropy and volunteerism); and
- Environment (protect and preserve the environment).

The index provider relies exclusively on software that analyzes publicly available data from Thomson Reuters/Refinitiv relating to the primary business activities, products and services, philanthropy, legal activities, policies and practices when assigning Inspire Impact Scores to a company. Thomson Reuters/Refinitiv provides data on over 6,000 companies globally across 400 different ESG metrics. The 200 securities with the highest Inspire Impact Scores are included in the Index and are equally weighted. The Index will typically be comprised of 80% in developed foreign securities and 20% in emerging market securities. The Inspire Impact Scores of the securities in the Index are reviewed periodically (at least annually), and the Index is rebalanced quarterly. If, upon review, the Inspire Impact Score of a security is negative, the security is removed from the Index and replaced with a positive scoring security.

The equity securities included in the Index are foreign equity securities of companies with capitalization of \$5 billion or more. The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Index concentrates in an industry or group of industries. The adviser is also the index provider.

PRINCIPAL INVESTMENT RISKS:

The following describes the risks born by the Fund with respect to its investments.

Asset Class Risk. Securities in the Index or in a Fund's portfolio may underperform in comparison to the general securities markets or other asset classes.

Authorized Participant Risk. Only an AP may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as APs on an agency basis (*i.e.*, on behalf of other market participants). To the extent that APs exit the business or are unable to proceed with creation or redemption orders with respect to the Fund and no other AP is able to step forward to create or redeem Creation Units, Fund shares may be more likely to trade at a premium or discount to NAV and possibly face trading halts or delisting. AP concentration risk may be heightened for ETFs that invest in non-U.S. securities or other securities or instruments that have lower trading volumes.

Biblically Responsible Investment Risk. The Fund invests at least 80% of its assets in the component securities of the Index which uses the Inspire Impact Score(R) and related biblical values screening criteria in selecting its component securities. As a result of its strategy, the Index's exclusion of securities of certain issuers for nonfinancial reasons may cause the Fund to forgo some market opportunities available to funds that do not use these criteria. This could be due to biblically responsible companies falling out of favor with investors or failing to perform as well as companies that do not receive a favorable Inspire Impact Score(R).

Concentration Risk. Sector risk is the possibility that securities within the same group of industries will decline in price due to sector-specific market or economic developments. If the Fund invests more heavily in a particular industry, the value of its shares may be especially sensitive to factors and economic risks that specifically affect that industry. As a result, the Fund's share price may fluctuate more widely than the value of shares of a mutual fund that invests in a broader range of industries. Additionally, some industries could be subject to greater government regulation than other sectors. Therefore, changes in regulatory policies for those industries may have a material effect on the value of securities issued by companies in those industries. The industries in which the Fund may invest, directly or indirectly, will vary based on the investments of the Index.

Early Close/Trading Halt Risk. An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may prevent the Fund from buying or selling certain securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and may incur substantial trading losses.

Emerging Markets Risk: The Fund may invest in Underlying Funds that invest in securities issued by companies in countries with newly organized or less developed securities markets. There are typically greater risks involved in investing in emerging markets securities. Generally, economic structures in these countries are less diverse and mature than those in developed countries and their political systems tend to be less stable. Emerging market economies may be based on only a few industries, therefore security issuers, including governments, may be more susceptible to economic weakness and more likely to default. Emerging market countries also may have relatively unstable governments, weaker economies, and less-developed legal systems with fewer security holder rights. Investments in emerging markets countries may be affected by government policies that restrict foreign investment in certain issuers or industries. The potentially smaller size of their securities markets and lower trading volumes can make investments relatively illiquid and potentially more volatile than investments in developed countries, and such securities may be subject to abrupt and severe price declines. Due to this relative lack of liquidity, the Fund may have to accept a lower price or may not be able to sell a portfolio security at all. An inability to sell a portfolio position can adversely affect the Fund's value or prevent the Fund from being able to meet cash obligations or take advantage of other investment opportunities.

Equity Securities Risk. Fluctuations in the value of equity securities held by the Fund will cause the net asset value ("NAV") of the Fund and the price of its shares ("Shares") to fluctuate.

- **Common Stock Risk.** Common stock of an issuer in the Fund's portfolio may decline in price if the issuer fails to make anticipated dividend payments. Common stock will be subject to greater dividend risk than preferred stocks or debt instruments of the same issuer. In addition, common stocks have experienced significantly more volatility in returns than other asset classes.
- **Preferred Stock Risk.** Generally, preferred stockholders (such as the Fund) have no voting rights with respect to the issuing company unless certain events occur. In addition, preferred stock will be subject to greater credit risk than debt instruments of an issuer, and could be subject to interest rate risk like fixed income securities, as described below. An issuer's board of directors is generally not under any obligation to pay a dividend (even if dividends have accrued), and may suspend payment of dividends on preferred stock at any time. There is also a risk that the issuer of any of the Fund's holdings will default and fail to make scheduled dividend payments on the preferred stock held by the Fund).

ETF Structure Risk: The Fund is structured as an ETF and as a result is subject to the special risks, including:

- *Not Individually Redeemable.* Shares are not redeemable by retail investors and may be redeemed only by the APs at NAV and only in Creation Units. A retail investor generally incurs brokerage costs when selling shares.
- *Trading Issues.* Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange, which may result in the Fund's shares being delisted. An active trading market for the Shares may not be developed or maintained. If the Shares are traded outside a collateralized settlement system, the number of financial institutions that can act as APs that can post collateral on an agency basis is limited, which may limit the market for the Shares.
- *Market Price Variance Risk.* Individual Shares of the Fund that are listed for trading on the Exchange can be bought and sold in the secondary market at market prices. The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares. There may be times when the market price and the NAV vary significantly and you may pay more than NAV when buying Shares on the secondary market, and you may receive less than NAV when you sell those Shares. The market price of Shares, like the price of any exchange-traded security, includes a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the particular security. In times of severe market disruption, the bid-ask spread often increases significantly. This means that Shares may trade at a discount to NAV and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that you most want to sell your Shares. The Fund's investment results are measured based upon the daily NAV of the Fund over a period of time. Investors purchasing and selling Shares in the secondary market may not experience investment results consistent with those experienced by those APs creating and redeeming directly with the Fund.
 - In times of market stress, market makers may step away from their role market making in shares of ETFs and in executing trades, which can lead to differences between the market value of Shares and the Fund's NAV.
 - The market price for the Shares may deviate from the Fund's NAV, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Shares than the Fund's NAV, which is reflected in the bid and ask price for Fund shares or in the closing price.
 - When all or a portion of an ETFs underlying securities trade in a market that is closed when the market for the Shares is open, there may be changes from the last quote of the closed market and the quote from the Fund's domestic trading day, which could lead to differences between the market value of the Shares and the Fund's NAV.
 - In stressed market conditions, the market for the Shares may become less liquid in response to the deteriorating liquidity of the Fund's portfolio. This adverse effect on the liquidity of the Shares may, in turn, lead to differences between the market value of the Shares and the Fund's NAV.

Foreign Securities Risk: The Fund could be subject to greater risks because the Fund's performance may depend on issues other than the performance of a particular company or U.S. market sector. Changes in foreign economies and political climates are more likely to affect the Fund than a mutual fund that invests exclusively in U.S. companies. The value of foreign securities is also affected by the value of the local currency relative to the U.S. dollar. There may also be less government supervision of foreign markets, resulting in non-uniform accounting practices and less publicly available information. The lack of readily available publicly available information may lead to inaccurate Inspire Impact Scores. Not all countries and jurisdictions monitor or regulate all ESG factors so that there may be no relevant information available for certain factors. The values of foreign investments may be affected by changes in exchange control regulations, application of foreign tax laws (including withholding tax), changes in governmental administration or economic or monetary policy (in this country or abroad) or changed circumstances in dealings between nations. In addition, foreign brokerage commissions, custody fees and other costs of investing in foreign securities are generally higher than in the United States. Investments in foreign issues could be affected by other factors not present in the United States, including expropriation, armed conflict, confiscatory taxation, and potential difficulties in enforcing contractual obligations. As a result, the Fund may be exposed to greater risk and will be more dependent on the adviser's ability to assess such risk than if the Fund invested solely in more developed countries.

Limited History of Operations Risk: The Fund is a new ETF with a limited history of operations for investors to evaluate.

Market Risk: Stock market Risk is the risk that the value of securities owned by the Fund may go up or down, sometimes rapidly or unpredictably, due to factors affecting particular companies or the securities markets generally. A general downturn in the securities market may cause multiple asset classes to decline in value simultaneously, although equity securities generally have greater price volatility than fixed income securities. Despite gains in some markets after steep declines during certain periods of 2008-2009, negative conditions and price declines may return unexpectedly and dramatically. In addition, the Fund could experience a loss when selling securities in order to meet unusually large or frequent redemption requests in times of overall market turmoil or declining prices for the securities sold. Stock prices change daily, sometimes rapidly, in response to company activity and general economic and market conditions. Certain stocks may decline in value even during periods when the prices of equity securities in general are rising, or may not perform as well as the market in general. Stock prices may also experience greater volatility during periods of challenging market conditions such as the one that the market recently experienced.

Passive Investment Risk. The Fund is not actively managed and may be affected by a general decline in market segments related to the Index. The Fund invests in securities included in, or representative of securities included in, the Index, regardless of their investment merits. The Fund does not take defensive positions under any market conditions, including conditions that are adverse to the performance of the Fund, unless such defensive positions are also taken by the Index.

Sampling Risk. The Fund's use of a representative sampling approach, if used, could result in its holding a smaller number of securities than are in the Index. As a result, an adverse development with an issuer of securities held by the Fund could result in a greater decline in NAV than would be the case if the Fund held all of the securities in the Index. To the extent the assets in the Fund are smaller, these risks will be greater.

Small and Medium Capitalization Risk: The stocks of small and medium capitalization companies involve substantial risk. These companies may have limited product lines, markets or financial resources, and they may be dependent on a limited management group. Stocks of these companies may be subject to more abrupt or erratic market movements than those of larger, more established companies or the market averages in general.

Tracking Error Risk. Tracking error is the divergence of the Fund's performance from that of the Index. Tracking error may occur because of imperfect correlation between the Fund's holdings of portfolio securities and those in the Index, pricing differences, the Fund's holding of cash, differences on timing of the accrual of dividends, changes to the Index or the need to meet various regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Index does not.

SECURITIES LENDING: To generate additional income, the Fund may lend its portfolio securities to qualified banks, broker-dealers and other financial institutions (referred to as "borrowers"), provided that: (i) the loan is continuously secured by collateral in cash, cash equivalents, bank letters of credit or U.S. Government securities equal to at least 100% of the value of the loaned securities, and such collateral is valued, or "marked to market," daily (borrowers are required to furnish additional collateral to a Fund as necessary to fully cover its obligations); (ii) the loan may be recalled at any time by the Fund and the loaned securities returned; (iii) a Fund will receive any interest, dividends or other distributions paid on the loaned securities; and (iv) the aggregate value of the loaned securities will not exceed 33 1/3% of a Fund's total assets. A Fund generally retains part or all of the interest received on investment of the cash collateral or receives a fee from the borrower. While this practice will not impact a Fund's principal investment strategy, it does subject a Fund to the securities lending risk described in this Prospectus.

Loans of securities involve a risk that the borrower may fail to return the securities or may fail to maintain the proper amount of collateral, which may result in a loss of money by a Fund or a delay in recovering the loaned securities. In addition, in the event of bankruptcy of the borrower, the Fund could experience delays in recovering the loaned securities or only recover cash or a security of equivalent value. Therefore, a Fund will only enter into portfolio loans after a review of all pertinent factors by the Adviser under the oversight of the Board, including the creditworthiness of the borrower and then only if the consideration to be received from such loans would justify the risk. Creditworthiness will be monitored on an ongoing basis by the adviser. An attempt may be made to recall a loan in time to vote proxies if fund management has knowledge of a material vote respect to the loaned securities and the matter involved would have a material effect on a Fund's investment in the security. The costs of securities lending are not reflected in the "Annual Fund Operating Expenses" table or "Example" above.

Securities Lending Risk. The Fund may lend its portfolio securities to financial institutions under guidelines adopted by the Board of Trustees, including a requirement that the Fund receive cash collateral from the borrower equal to no less than 100% of the market value of the securities loaned. The Fund may invest this cash collateral in high quality short-term debt obligations, government obligations, bank guarantees or money market mutual funds. Securities lending involves two primary risks: "investment risk" and "borrower default risk." Investment risk is the risk that the Fund will lose money from the investment of the cash collateral. Borrower default risk is the risk that the Fund will lose money due to the failure of a borrower to return a borrowed security in a timely manner.

PORTFOLIO HOLDINGS DISCLOSURE: A description of the Fund's policies and procedures regarding the release of portfolio holdings information is available in the Fund's Statement of Additional Information ("SAI") and on the Fund's website, www.inspireETF.com.

CYBERSECURITY: The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach.

Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact the Fund's business operations, potentially resulting in financial losses; interference with the Fund's ability to calculate its NAV; impediments to trading; the inability of the Fund, the Adviser, and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Fund invests; counterparties with which the Fund engages in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for the Fund's shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

MANAGEMENT

INVESTMENT ADVISER: CWM Advisors, LLC dba Inspire, located at 650 San Benito Street, Suite 130, Hollister, CA 95023, serves as the Fund's investment adviser (the "Adviser"). The Adviser is registered with the SEC as an investment adviser under the Investment Advisers Act of 1940, as amended. The Adviser manages accounts for individuals and institutions as well as the Fund. As of August 30, 2019, it had approximately \$600 million in asset under management.

Subject to oversight of the Board of Trustees (the "Board"), the Adviser is responsible for managing the Fund's investments, placing trade orders and providing related administrative services and facilities under an advisory agreement between the Fund and the Adviser (the "Investment Advisory Agreement").

The management fee set forth in the Investment Advisory Agreement is an annual rate of 0.45% of the average daily net assets of the Fund to be paid on a monthly basis. In addition to investment advisory fees, the Fund pays other expenses including costs incurred in connection with the maintenance of securities law registration, printing and mailing prospectuses and statements of additional information to shareholders, certain financial accounting services, taxes or governmental fees, custodial, transfer and shareholder servicing agent costs, expenses of outside counsel and independent accountants, preparation of shareholder reports and expenses of trustee and shareholders meetings.

A discussion regarding the basis for the Board of Trustees' approval of the Investment Advisory Agreement will be available in the Fund's annual report to shareholders November 30, 2019.

PORTFOLIO MANAGERS

Robert Netzly has been the founder and CEO of the Adviser since 2015. Mr. Netzly is a nationally recognized expert in Biblically Responsible Investing (BRI) and leader in the BRI movement. He has also served as founder and CEO of Christian Wealth Management since 2011. Mr. Netzly was a registered representative at Wells Fargo Investments, Private Client Service, serving the bank's highest net worth clientele from 2008 to 2011.

Darrell Jayroe, CFA, has been Portfolio Manager with the Adviser since 2016. Mr. Jayroe previously held the position of lead Portfolio Manager at Bank of Oklahoma from 2004 to 2016. Prior to that, he held management positions at Southwest Securities (2003 to 2004) and at UBS Paine Weber (1994 to 2003).

The SAI provides additional information about the Portfolio Managers' compensation, other accounts managed and ownership of Fund shares.

HOW SHARES ARE PRICED

Shares of the Fund are sold at NAV. The NAV of the Fund is determined at the close of regular trading (normally 4:00 p.m. Eastern Time) on each day the Exchange is open for business. NAV is computed by determining the aggregate market value of all assets of the applicable Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV). The Exchange is closed on weekends and New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day ("Exchange Close"). The NAV takes into account the expenses and fees of the Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for the Fund for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the Exchange on that day.

Generally, the Fund's portfolio securities, including securities issued by ETFs, are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. Securities that are not traded on any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity.

With respect to any portion of a Fund's assets that are invested in ETFs, the Fund's NAV is calculated based upon the net asset values of those open-end management investment companies, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

If market quotations are not readily available, securities will be valued at their fair market value as determined using the "fair value" procedures approved by the Board. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different than the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes available. The Board has delegated execution of these procedures to a fair value committee composed of one or more representatives from each of the (i) Trust, (ii) administrator, and (iii) Adviser. The committee may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board reviews and ratifies the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

The Funds may use independent pricing services to assist in calculating the value of the Fund's portfolio securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for the Funds.

In computing the NAV, the Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the Exchange. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in the Fund's portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before the Fund prices its shares, the security will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Adviser may need to price the security using the Fund's fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund's portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund's NAV by short term traders. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine NAV, or from the price that may be realized upon the actual sale of the security.

Premium/Discount Information

Investors other than Authorized Participants will buy and sell Shares in secondary market transactions through brokers at market prices and the Shares will trade at market prices. The market price of Shares may be greater than, equal to, or less than NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares.

Information regarding the intraday value of shares of the Fund, also known as the “indicative optimized portfolio value” (“IOPV”), is disseminated every 15 seconds throughout each trading day by the securities exchange on which the Funds’ shares are listed or by market data vendors or other information providers. The IOPV is based on the current market value of the Fund’s securities, including cash required to be deposited in exchange for a Creation Unit. The IOPV is generally determined by using both current market quotations and price quotations obtained from broker-dealers and other market intermediaries that may trade in the Fund’s portfolio securities. The IOPV may not reflect the exact composition of the Fund’s current portfolio of securities at a particular point in time or the best possible valuation of a Fund’s current portfolio. As a result, the IOPV should not be confused with the NAV, which is computed only once a day. Information regarding how often the Shares traded at a price above (at a premium to) or below (at a discount to) the NAV of the Fund during the past four calendar quarters, when available, can be found at Inspireinvesting.com.

HOW TO BUY AND SELL SHARES

Shares of the Fund are listed for trading on the Exchange under the symbol WWJD. Share prices are reported in dollars and cents per Share. Shares can be bought and sold on the secondary market throughout the trading day like other publicly traded shares, and Shares typically trade in blocks of less than a Creation Unit. There is no minimum investment required. Shares may only be purchased and sold on the secondary market when the Exchange is open for trading. The Exchange is open for trading Monday through Friday and is closed on weekends and the following holidays, as observed: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction.

APs may acquire Shares directly from the Fund, and APs may tender their Shares for redemption directly to the Fund, at NAV per Share only in large blocks, or Creation Units, of 50,000 Shares. Purchases and redemptions directly with the Fund must follow the Fund’s procedures, which are described in the SAI.

The Fund may liquidate and terminate at any time without shareholder approval.

Share Trading Prices

The approximate value of Shares, an amount representing on a per share basis the sum of the current market price of the securities accepted by the Fund in exchange for Shares and an estimated cash component will be disseminated every 15 seconds throughout the trading day through the facilities of the Consolidated Tape Association. This approximate value should not be viewed as a “real-time” update of the NAV per Share because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate value of the Shares, and the Fund does not make any warranty as to the accuracy of these values.

Book Entry

Shares are held in book entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding Shares and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book entry or “street name” form.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

Shares can only be purchased and redeemed directly from the Funds in Creation Units by APs, and the vast majority of trading in Shares occurs on the secondary market. Because the secondary market trades do not directly involve the Fund, it is unlikely those trades would cause the harmful effects of market timing, including dilution, disruption of portfolio management, increases in the Fund's trading costs and the realization of capital gains. With regard to the purchase or redemption of Creation Units directly with the Fund, to the extent effected in-kind (*i.e.*, for securities), those trades do not cause the harmful effects that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, those trades could result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund's ability to achieve its investment objective. However, direct trading by APs is critical to ensuring that Shares trade at or close to NAV. The Fund also employs fair valuation pricing to minimize potential dilution from market timing. In addition, the Fund imposes transaction fees on purchases and redemptions of Shares to cover the custodial and other costs incurred by the Fund in effecting trades. These fees increase if an investor substitutes cash in part or in whole for securities, reflecting the fact that the Fund's trading costs increase in those circumstances. Given this structure, the Trust has determined that it is not necessary to adopt policies and procedures to detect and deter market timing of the Shares.

DISTRIBUTION AND SERVICE PLAN

The Fund has adopted a distribution and service plan ("Plan") pursuant to Rule 12b-1 under the 1940 Act. Under the Plan, the Fund is authorized to pay distribution fees to the distributor and other firms that provide distribution and shareholder services ("Service Providers"). If a Service Provider provides these services, the Fund may pay fees at an annual rate not to exceed 0.25% of average daily net assets, pursuant to Rule 12b-1 under the 1940 Act.

No distribution or service fees are currently paid by the Fund and will not be paid by the Fund unless authorized by the Trust's Board of Trustees. There are no current plans to impose these fees. In the event Rule 12b-1 fees were charged, over time they would increase the cost of an investment in the Fund.

DIVIDENDS, OTHER DISTRIBUTIONS AND TAXES

Shares are traded throughout the day in the secondary market on a national securities exchange on an intra-day basis and are created and redeemed in-kind and/or for cash in Creation Units at each day's next calculated NAV. In-kind arrangements are designed to protect ongoing shareholders from the adverse effects on the Fund's portfolio that could arise from frequent cash redemption transactions. In a conventional mutual fund, redemptions can have an adverse tax impact on taxable shareholders if the mutual fund needs to sell portfolio securities to obtain cash to meet net fund redemptions. These sales may generate taxable gains for the ongoing shareholders of the mutual fund, whereas the Shares' in-kind redemption mechanism generally will not lead to a tax event for the Fund or its ongoing shareholders.

Ordinarily, dividends from net investment income, if any, are declared and paid quarterly by the Fund. The Fund distributes its net realized capital gains, if any, to shareholders annually. The Fund may also pay a special distribution at the end of a calendar year to comply with federal tax requirements.

No dividend reinvestment service is provided by the Fund. Broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by beneficial owners of the Fund for reinvestment of their dividend distributions. Beneficial owners should contact their broker to determine the availability and costs of the service and the details of participation therein. Brokers may require beneficial owners to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares of the Fund purchased in the secondary market.

Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

Taxes

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when:

- The Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

Taxes on Distributions

Distributions from the Fund's net investment income, including net short-term capital gains, if any, are taxable to you as ordinary income, except that the Fund's dividends attributable to its "qualified dividend income" (*i.e.*, dividends received on stock of most domestic and certain foreign corporations with respect to which the Fund satisfies certain holding period and other restrictions), if any, generally are subject to federal income tax for non-corporate shareholders who satisfy those restrictions with respect to their Shares at the rate for net capital gain. A part of the Fund's dividends also may be eligible for the dividends-received deduction allowed to corporations -- the eligible portion may not exceed the aggregate dividends the Fund receives from domestic corporations subject to federal income tax (excluding REITs) and excludes dividends from foreign corporations -- subject to similar restrictions. However, dividends a corporate shareholder deducts pursuant to that deduction are subject indirectly to the federal alternative minimum tax.

In general, your distributions are subject to federal income tax when they are paid, whether you take them in cash or reinvest them in the Fund (if that option is available). Distributions reinvested in additional Shares through the means of a dividend reinvestment service, if available, will be taxable to shareholders acquiring the additional Shares to the same extent as if such distributions had been received in cash. Distributions of net long-term capital gains, if any, in excess of net short-term capital losses are taxable as long-term capital gains, regardless of how long you have held the Shares.

Distributions in excess of the Fund's current and accumulated earnings and profits are treated as a tax-free return of capital to the extent of your basis in the Shares and as capital gain thereafter. A distribution will reduce the Fund's NAV per Share and may be taxable to you as ordinary income or capital gain (as described above) even though, from an investment standpoint, the distribution may constitute a return of capital.

By law, the Fund is required to withhold 28% of your distributions and redemption proceeds if you have not provided the Fund with a correct Social Security number or other taxpayer identification number and in certain other situations.

Taxes on Exchange-Listed Share Sales

Any capital gain or loss realized upon a sale of Shares is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses from sales of Shares may be limited.

Taxes on Purchase and Redemption of Creation Units

An AP who exchanges securities for Creation Units generally will recognize a gain or a loss equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the exchanger's aggregate basis in the securities surrendered plus any Cash Component it pays. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities received plus any cash equal to the difference between the NAV of the Shares being redeemed and the value of the securities. The Internal Revenue Service ("Service"), however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales" or for other reasons. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less.

If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Shares you purchased or sold and at what price. See "Tax Status" in the SAI for a description of the newly effective requirement regarding basis determination methods applicable to Share redemptions and the Fund's obligation to report basis information to the Service.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences of an investment in the Shares under all applicable tax laws. See "Tax Status" in the SAI for more information.

FUND SERVICE PROVIDERS

Gemini Fund Services, LLC is the Fund's administrator and fund accountant. It has its principal office at 17645 Wright Street, Suite 200, Omaha, NE 68130, and is primarily in the business of providing administrative, fund accounting and transfer agent services to retail and institutional mutual funds. It is an affiliate of Northern Lights Distributors, LLC.

Brown Brothers Harriman & Co., 50 Post Office Square, Boston, MA 02110, is the Funds' transfer agent and custodian.

Northern Lights Distributors, LLC (the "Distributor"), 17645 Wright Street, Suite 200, Omaha, NE 68130, is the distributor for the shares of the Funds. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. ("FINRA").

Thompson Hine LLP, 41 South High Street, 17th Floor, Columbus, Ohio 43215, serves as legal counsel to the Trust.

BBD, LLP, 1835 Market Street, 3rd Floor, Philadelphia, PA 19103, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

OTHER INFORMATION

Investments by Investment Companies

The SEC has granted an exemptive order to the advisor permitting registered investment companies and unit investment trusts that enter into an agreement with the Trust ("Investing Funds") to invest in series of the Trust beyond the limits set forth in Section 12(d)(1) of the 1940 Act subject to certain terms and conditions.

Continuous Offering

The method by which Creation Units of Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Funds on an ongoing basis, a "distribution," as such term is used in the Securities Act of 1933, as amended (the "Securities Act"), may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares and sells the Shares directly to customers or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not "underwriters" but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker-dealer firms should note that dealers who are not "underwriters" but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallotment within the meaning of Section 4(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

Dealers effecting transactions in the Shares, whether or not participating in this distribution, are generally required to deliver a Prospectus. This is in addition to any obligation of dealers to deliver a Prospectus when acting as underwriters.

Householding: To reduce expenses, the Fund mail only one copy of the prospectus and each annual and semi-annual report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call the Fund at 877.658.9473 on days the Fund is open for business or contact your financial institution. The Fund will begin sending you individual copies thirty days after receiving your request.

FINANCIAL HIGHLIGHTS

Because the Fund has only recently commenced investment operations, no financial highlights are available for the Fund at this time. In the future, financial highlights will be presented in this section of the Prospectus.

PRIVACY NOTICE

NORTHERN LIGHTS FUND TRUST IV

Rev. August 2015

FACTS

WHAT DOES NORTHERN LIGHTS FUND TRUST IV DO WITH YOUR PERSONAL INFORMATION?

Why?

Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some, but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

What?

The types of personal information we collect and share depends on the product or service that you have with us. This information can include:

- Social Security number and wire transfer instructions
- account transactions and transaction history
- investment experience and purchase history

When you are *no longer* our customer, we continue to share your information as described in this notice.

How?

All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Northern Lights Fund Trust IV chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information:	Does Northern Lights Fund Trust IV share information?	Can you limit this sharing?
For our everyday business purposes - such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus.	YES	NO
For our marketing purposes - to offer our products and services to you.	NO	We don't share
For joint marketing with other financial companies.	NO	We don't share
For our affiliates' everyday business purposes - information about your transactions and records.	NO	We don't share
For our affiliates' everyday business purposes - information about your credit worthiness.	NO	We don't share
For nonaffiliates to market to you	NO	We don't share
