

Kensington Dynamic Growth Fund

**Class A Shares (KAGAX)
Class C Shares (KAGCX)
Institutional Class Shares (KAGIX)**

SUMMARY PROSPECTUS

October 20, 2020

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund at <https://regdocs.blugiant.com/kensington/>. You can also get this information at no cost by calling 1-855-375-3060, emailing OrderKensingtonFund@ultimusfundsolutions.com or by asking any financial intermediary that offers shares of the Fund. The Fund's Prospectus and Statement of Additional Information, both dated October 20, 2020, are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website or phone number noted above.

ADVISORS PREFERRED

Advisors Preferred, LLC
1445 Research Boulevard, Ste. 530
Rockville, MD 20850

These securities have not been approved or disapproved by the Securities and Exchange Commission, nor has the Securities and Exchange Commission passed upon the accuracy or adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's shareholder reports like this one will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Fund's website www.advisorspreferred.com/fund-documents, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund electronically by contacting your financial intermediary (such as a broker-dealer or bank) or, if you are a direct investor, by following the instructions included with paper Fund documents that have been mailed to you. You may also elect to receive all future reports in paper free of charge.

Investment Objective: The Kensington Dynamic Growth Fund seeks capital gains.

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts on purchases of Class A shares if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund. More information about these and other discounts is available from your financial professional and in **How to Purchase Shares** on page 9 in the fund’s Prospectus.

Shareholder Fees (fees paid directly from your investment)	Class A	Class C	Institutional Class
Maximum Sales Charge (Load) Imposed on Purchases (as a % of offering price)	4.75%	None	None
Maximum Deferred Sales Charge (Load) ⁽¹⁾ (as a % of original purchase price)	None	1.00%	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends and other Distributions	None	None	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	Class A	Class C	Institutional Class
Management Fees	1.25%	1.25%	1.25%
Distribution and/or Service (12b-1) Fees	0.25%	1.00%	0.00%
Other Expenses ⁽²⁾	0.65%	0.50%	0.50%
Acquired Fund Fees and Expenses ⁽³⁾	0.15%	0.15%	0.15%
Total Annual Fund Operating Expenses	2.30%	2.90%	1.90%
Fee Waivers ⁽⁴⁾	(0.11)%	(0.11)%	(0.11)%
Total Annual Fund Operating Expenses After Fee Waivers	2.19%	2.79%	1.79%

- (1) The Fund’s distributor may advance to, or reimburse, the Fund 1.00% of the purchase price in connection with 12b-1 fees advanced to authorized broker-dealers on purchases of Class C shares. However, when the distributor makes such a payment, the respective Class C shares are subject to a 1.00% contingent deferred sales charge (“CDSC”) payable to the distributor on shares redeemed prior to the first 12 months after their purchase. Shareholders will be notified at the time of purchase if the shares purchased are subject to this CDSC.
- (2) Other Expenses are estimated for the current fiscal year. For Class A shares, Other Expenses may include shareholder service expenses that may include sub-transfer agent and sub-custodian fees.
- (3) Acquired Fund Fees and Expenses, which are estimated for the current fiscal year, are indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund’s financial highlights, when issued, because the financial statements include only the direct operating expenses incurred by the Fund and does not include the indirect costs of investing in other investment companies.
- (4) Pursuant to an operating expense limitation agreement between Advisers Preferred, LLC (the “Adviser”), Kensington Analytics LLC (the “Sub-Adviser”) and the Fund, the Adviser and Sub-Adviser have agreed to waive its fees and/or absorb expenses of the Fund to ensure that Total Annual Fund Operating Expenses (excluding any brokerage fees and commissions, acquired fund fees and expenses, borrowing costs (such as interest and dividend expense on securities sold short), taxes and extraordinary expenses such as litigation) do not exceed 2.04%, 2.64%, and 1.64% respectively of the average net assets, for Class A, Class C, and Institutional Class shares, respectively, through October 19, 2021. The Fund’s Board of trustees may terminate this agreement. The Adviser and Sub-Adviser are permitted to receive reimbursement from the Fund for fees it waived and Fund expenses it paid, subject to the limitation that: (1) the reimbursement for fees and expenses will be made only if payable within three years from the date the fees and expenses were initially waived or reimbursed; and (2) the reimbursement may not be made if it would cause the expense limitation in effect at the time of the waiver or currently in effect, whichever is lower, to be exceeded.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

Class	1 Year	3 Year
A	\$687	\$1,149
C	\$282	\$887
Institutional	\$182	\$586

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance.

Principal Investment Strategies: The Adviser delegates execution of the Fund’s investment strategy to Kensington Analytics LLC (the “Sub-Adviser”). The Sub-Adviser seeks to achieve the Fund’s investment objective by investing primarily in domestic equity-index exchange traded funds (“ETFs”), domestic equity-index mutual funds, and U.S. Treasury debt. The Fund invests without restriction as to equity issuer capitalization. The Fund invests in U.S. Treasury debt of any maturity. The Fund invests in equity securities indirectly through ETFs and mutual funds. The Sub-Adviser selects ETFs and mutual funds based on performance, relative fees, management experience and underlying portfolio composition and strategy. The Fund is non-diversified, which means it may invest a high percentage of its assets in a limited number of securities.

The Sub-Adviser’s strategy is principally driven by a proprietary “Dynamic Growth Model” that is designed to tactically alternate between a “risk-on” state in response to advancing equity markets and a “risk-off” state during times of market weakness. When switching risk states, the Fund’s entire portfolio is reallocated. The strategy relies upon a proprietary quantitative decision model that generates signals to purchase equity index ETFs and/or mutual funds when in bullish risk-on mode, and U.S. Treasury securities when in bearish risk-off mode. The Sub-Adviser selects holdings for the Fund’s portfolio when in risk-on mode with the aim of diversifying across equity indices. The model is calculated on the last trading day of each week, using only the weekly high, low, close and open prices of the Nasdaq Composite Index.

The model is built upon a core of trend-following logic that generates signals on a weekly basis. To avoid generating false signals directing a change to-or-from a risk-on or risk-off state, the model also employs noise-filtering. This noise-filtering enhancement is intended to dampen the distorting impact of short-term price aberrations that are characteristic of today’s volatile markets. This noise filter operates by causing the model to disregard relatively large short-term changes in inputs that are not indicative of a longer-term trend.

The Sub-Adviser engages in frequent trading to achieve the Fund’s investment objective, which will result in turnover in excess of 100%.

Principal Investment Risks: As with all mutual funds, there is the risk that you could lose money through your investment in the Fund. The Fund is not intended to be a complete investment program. Many factors affect the Fund’s Net Asset Value and performance. The following risks apply to the Fund directly and indirectly through the Fund’s investment in ETFs and mutual funds.

- *Management Risk:* The Sub-Adviser’s reliance on its Dynamic Growth Model, its strategies and judgments about the attractiveness, value and potential appreciation of particular assets may prove to be incorrect and may not produce the desired results.
- *Equity Risk:* The NAV of the Fund will fluctuate based on changes in the value of the equity securities (common and preferred stocks) in which it invests. Equity prices can fall rapidly in response to developments affecting a specific company or industry, or to changing economic, political or market conditions. Preferred stocks typically decline in value when interest rates rise. Preferred stocks are also subject to credit risk because of the possibility that an issuer fail to make its preferred stock dividend payments.
- *ETF Risk:* ETFs are subject to investment advisory or management and other expenses, which will be indirectly paid by the Fund. As a result, your cost of investing in the Fund will be higher than the cost of investing directly in ETFs and may be higher than other mutual funds that invest directly in stocks and bonds. ETFs are listed on national stock exchanges and are traded like stocks listed on an exchange. ETF shares may trade at a discount or a premium in market price if there is a limited market in such shares. ETFs are also subject to brokerage and/or other trading costs, which could result in greater expenses to the Fund. Because the value of ETF shares depends on the demand in the market, the Sub-Adviser may not be able to liquidate the Fund’s holdings at the most optimal time, adversely affecting performance.
- *Interest Rate Risk:* Typically, a rise in interest rates causes a decline in the value of bonds. Recently, interest rates have been historically low. Current conditions may result in a rise in interest rates, which in turn may result in a decline in the value of the fixed income investments held by the Fund. As a result, interest rate risk may be heightened.
- *Limited History of Operations Risk:* The Fund has a limited history of operations for investors to evaluate. The Fund may fail to attract sufficient assets to operate efficiently.
- *Market Risk:* Overall investment market risks affect the value of the Fund. Factors such as economic growth and market conditions, interest rate levels, and political events affect the US and international investment markets. Additionally, unexpected local, regional or global events, such as war; acts of terrorism; financial, political or social disruptions; natural, environmental or man-made disasters; the spread of infectious illnesses or other public health issues (such as the global pandemic coronavirus disease 2019 (COVID-19)); and recessions and depressions could have a significant impact on the Fund and its investments and may impair market liquidity. Such events can cause investor fear, which can adversely affect the economies of nations, regions and the market in general, in ways that cannot necessarily be foreseen.
- *Mutual Fund Risk:* Investments in mutual funds involve duplication of investment advisory fees and certain other expenses. Each mutual fund is subject to specific risks, depending on the nature of its investment strategy. The manager of a mutual fund may not be successful in implementing its strategy.

- **Non-Diversification Risk:** As a non-diversified fund, the Fund may invest more than 5% of its total assets in the securities of one or more issuers. The Fund also invests in ETFs and mutual funds that are non-diversified. The Fund’s performance may be more sensitive to any single economic, business, political or regulatory occurrence than the value of shares of a diversified investment company.
- **Small- and Mid-Capitalization Companies Risk:** Investing in the securities of small-capitalization and mid-capitalization companies involves greater risks and the possibility of greater price volatility than investing in larger capitalization and more-established companies. Investments in mid-cap companies involve less risk than investing in small-cap companies. Smaller companies may have limited operating history, product lines, and financial resources, and the securities of these companies may lack sufficient market liquidity. Mid-cap companies often have narrower markets and more limited managerial and financial resources than larger, more established companies.
- **Turnover Risk:** A higher portfolio turnover may result in higher transactional and brokerage costs. The Fund’s portfolio turnover rate is expected to be above 100% annually.

Is the Fund Right for You?

The Fund is intended for investors who want capital gains and can tolerate net asset value (“NAV”) fluctuations associated with the equity market.

Performance: Because the Fund has less than a full calendar year of investment operations, no performance information is presented for the Fund at this time. In the future, performance information will be presented in this section of the Prospectus. Also, shareholder reports containing financial and performance information will be mailed to shareholders semi-annually. Updated performance information and daily NAV per share will be available at no cost by calling toll-free 1-855-375-3060.

Investment Adviser: Advisors Preferred, LLC

Investment Sub-Adviser: Kensington Analytics LLC

Portfolio Manager: Bruce P. DeLaurentis, Chief Executive Officer of the Sub-Adviser, has served the Fund as a portfolio manager since it commenced operations in 2020.

Purchase and Sale of Fund Shares: The investment minimums for the Fund are:

Class	Initial Investment		Subsequent Investment	
	Regular Account	Retirement Account	Regular Account	Retirement Account
A	\$1,000	\$1,000	\$250	\$100
Institutional	\$25,000	\$25,000	\$250	\$100
C	\$1,000	\$1,000	\$250	\$100

The Fund or Adviser may waive any investment minimum. You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange (“NYSE”) is open. Redemption requests may be made in writing, by telephone, or through a financial intermediary and will be paid by ACH, check or wire transfer. Purchase and redemptions requests must be received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of regular trading on the NYSE (normally 4:00 p.m., Eastern Time) to assure ample time to transmit to the Fund prior to NAV pricing.

Tax Information: Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan such as an IRA or 401(k) Plan. However, these dividend and capital gain distributions may be taxable upon their eventual withdrawal from tax-deferred plans.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
