Before you invest, you want to review the Fund's complete prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund at <http://www.quantifiedfunds.com/fund-documents>. You can also get this information at no cost by calling 1-855-64-QUANT (1-855-647-8268), emailing orderquantifiedfunds@ultimusfundsolutions.com or by asking any financial intermediary that offers shares of the Fund. The Fund's prospectus, dated October 31, 2020, and statement of additional information, dated October 31, 2020, are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website or phone number noted above.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of each Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Funds' website www.advisorspreferred.com/fund-documents, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from each Fund electronically by contacting your financial intermediary (such as a broker-dealer or bank) or, if you are a direct investor, by following the instructions included with paper Fund documents that have been mailed to you. You may also elect to receive all future reports in paper free of charge.

Investment Objective: The Quantified Market Leaders Fund (the “Fund”) seeks high appreciation on an annual basis consistent with a high tolerance for risk.

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	Investor Class Shares	Advisor Class Shares
Management Fees	0.75%	0.75%
Distribution and/or Service (12b-1) Fees	0.25%	1.00%
Other Expenses	0.42% ⁽¹⁾	0.28%
Acquired Fund Fees and Expenses ⁽²⁾	<u>0.26%</u>	<u>0.26%</u>
Total Annual Fund Operating Expenses ⁽²⁾	1.68%	2.29%

(1) Includes up to 0.15% for sub-transfer agent and sub-accounting fees.

(2) The operating expenses in this fee table will not correlate to the expense ratio in the Fund’s financial highlights because the financial statements include only the direct operating expenses incurred by the Fund and do not include the indirect costs of investing in other investment companies.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

Class	1 Year	3 Year	5 Year	10 Year
Investor	\$171	\$530	\$913	\$1,987
Advisor	\$232	\$715	\$1,225	\$2,626

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the fiscal year ended June 30, 2020, the Fund’s portfolio turnover rate was 727% of the average value of its portfolio.

Principal Investment Strategies: The Fund’s investment adviser, Advisors Preferred, LLC (the “Adviser”), delegates execution of the Fund’s investment strategy to the subadviser, Flexible Plan Investments, Ltd. (“FPI” or the “Subadviser”). The Subadviser selects investments for the Fund and the Adviser provides trade placement. The Fund is aggressively managed by the Subadviser. The Fund will typically invest primarily in equity (common and preferred stocks) or investment grade fixed income securities either directly through individual stocks and American Depositary Receipts (a security that trades in the U.S. financial markets representing a security of a non-U.S. company) (“ADRs”) or indirectly through exchange-traded funds (“ETFs”) and other investment companies. The Fund invests in fixed-income securities without any restriction on maturity. Investments in ETFs and other investment companies may provide the Fund exposure to equity, income, sectors, domestic positions and international positions (including emerging markets), including positions relating to companies with small (less than \$2 billion) and/or medium (\$2 to \$5 billion) market capitalization. Leveraged and/or inverse ETFs may also be used. The Fund also may invest in leveraging instruments: futures contracts, forward contracts, options and swap agreements, as well as take short positions with up to 80% of its assets in equity securities, futures contracts, forward contracts, options and swap agreements. The Fund employs short positions for hedging purposes or to capture returns in down markets. The Fund employs an aggressive management strategy that typically results in high portfolio turnover.

The Subadviser defines a market leader as an asset class that has the highest price momentum (such as mid-cap equity compared to all equities). The Subadviser measures asset class price momentum by reference to an ETF that is representative of the asset class. Among representative ETFs, the Subadviser selects those with the highest price momentum, when compared to other ETFs in the asset class. In managing the Fund's assets, the Subadviser employs a dynamic asset allocation strategy. The Subadviser analyzes the overall investment opportunities of various market indexes to determine how to position the Fund's portfolio. The Subadviser evaluates and ranks the short-term total return performance of each market index and usually invests the Fund's assets in the top-performing equity securities within the top-ranked market indexes in accordance with Subadviser and third-party algorithms. The Subadviser may evaluate all indexes and individual equity securities as often as daily based on rankings but it may reallocate less often in order to minimize the impact and costs associated with trading. The Subadviser's ranking strategy attempts to respond to both the performance of each equity security, as well as the performance of the market indices.

The Subadviser typically assigns each holding in which it invests a minimum holding period, though the actual holding period and allocation weightings will depend on the performance ranking. The allocation weightings will likely not be changed for a period longer than the assigned holding period. By establishing holding periods, the Subadviser seeks to maintain longer-term core holdings in the Fund.

Finally, in making the decision to invest in a security, long or short, the Subadviser may utilize proprietary and third-party analysis models that evaluate interest rate trends and other macroeconomic data, market momentum, price and volatility patterns and other technical data or data related to accounting periods, tax events and other calendar-related events. The Subadviser also uses these proprietary and third-party analysis models to implement its dynamic asset allocation strategy which, at any time for defensive purposes, may result in a large portion or all of the fund's assets invested, directly or indirectly, in investment grade fixed income securities, cash and/or cash equivalents in order to seek to provide security of principal, current income and liquidity. In addition, the Subadviser uses the Fund as an asset allocation tool for its other clients, which may lead to purchases and redemptions of Fund shares. Responding to purchase and redemption-related fluctuations in the Fund's size will result in portfolio turnover not directly related to the preceding investment analysis.

Principal Investment Risks: An investment in the Fund entails risks. The Fund could lose money, or its performance could trail that of other investment alternatives. Neither the Subadviser nor the Adviser can guarantee that the Fund will achieve its objective. In addition, the Fund presents some risks not traditionally associated with other equity mutual funds. It is important that investors closely review and understand these risks before making an investment in the Fund. Turbulence in financial markets and reduced liquidity in equity, credit and fixed income markets could negatively affect issuers worldwide, including the Fund. There is the risk that you could lose all or a portion of your money on your investment in the Fund.

Subadviser's Investment Strategy Risk - While the Subadviser seeks to take advantage of investment opportunities for the Fund that will maximize its investment returns, there is no guarantee that such opportunities will ultimately benefit the Fund. The Subadviser will aggressively change the Fund's portfolio in response to market conditions that are unpredictable and may expose the Fund to greater market risk than other mutual funds. There is no assurance that the Subadviser's investment strategy will enable the Fund to achieve its investment objective. Determination of leadership status based on historical analysis may not be predictive of future leadership status.

Active and Frequent Trading Risk - The Fund may engage in active and frequent trading, leading to increased portfolio turnover, higher transaction costs, and the possibility of increased net realized capital gains, including net short-term capital gains that will be taxable to shareholders as ordinary income when distributed to them. The Subadviser's use of the Fund as an asset allocation tool for its other clients will increase the Fund's portfolio turnover.

Aggressive Investment Techniques Risk - The Fund uses investment techniques that may be considered aggressive. Risks associated with the use of futures contracts and options include potentially dramatic price changes (losses) in the value of the instruments and imperfect correlations between the price of the contract and the underlying security or index. These instruments may increase the volatility of the Fund and may involve a small investment of cash relative to the magnitude of the risk assumed.

Counterparty Risk - The Fund may invest in financial instruments involving counterparties for the purpose of attempting to gain exposure to a particular group of securities or asset class without actually purchasing those securities or investments, or to hedge a position. These financial instruments may include swap agreements. The use of swap agreements involves risks that are different from those associated with ordinary portfolio securities transactions. For example, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. Swap agreements also may be considered to be illiquid. In addition, the Fund may enter into swap agreements that involve a limited number of counterparties, which may increase the Fund's exposure to counterparty credit risk. The Fund does not specifically limit its counterparty risk with respect to any single counterparty. Further, there is a risk that no suitable counterparties are willing to enter into, or continue to enter into, transactions with the Fund and, as a result, the Fund may not be able to achieve its investment objective.

Credit Risk - The Fund could lose money if the issuer or guarantor of a debt security goes bankrupt or is unable or unwilling to make interest payments and/or repay principal. The value of a debt security may decline if there are concerns about an issuer's ability or willingness to make interest and or principal payments. Changes in an issuer's financial strength or in an issuer's or debt security's credit rating also may affect a security's value and thus have an impact on Fund performance. The Fund considers all derivatives and non-U.S. Treasury debt instruments as subject to credit risk.

Depository Receipt Risk - To the extent the Fund invests in stocks of foreign corporations, the Fund's investment in such stocks may also be in the form of depository receipts or other securities convertible into securities of foreign issuers, including American Depository Receipts ("ADRs"). While the use of ADRs, which are traded on exchanges and represent an ownership in a foreign security, provide an alternative to directly purchasing the underlying foreign securities in their respective national markets and currencies, investments in ADRs continue to be subject to many of the risks associated with investing directly in foreign securities.

Derivatives Risk - The Fund uses investment techniques, including investments in futures contracts, forward contracts, options and swaps, which may be considered aggressive. Investments in such derivatives are subject to market risks that may cause their prices to fluctuate over time and may increase the volatility of the Fund. The use of derivatives may expose the Fund to additional risks that it would not be subject to if it invested directly in the securities underlying those derivatives, such as counterparty risk and the risk that the derivatives may become illiquid. The use of derivatives may result in larger losses or smaller gains than otherwise would be the case. In addition, the Fund's investments in derivatives are currently subject to the following risks:

Futures and Forward Contracts. There may be an imperfect correlation between the changes in market value of the securities held by the Fund and the prices of futures contracts. There may not be a liquid secondary market for the futures contracts. Forward currency transactions include the risks associated with fluctuations in currency.

Hedging Risk. If the Fund uses a hedging instrument at the wrong time or judges the market conditions incorrectly, the hedge might be unsuccessful, reduce the Fund's investment return, or create a loss.

Options. There may be an imperfect correlation between the prices of options and movements in the price of the securities (or indices) hedged or used for cover which may cause a given hedge not to achieve its objective.

Swap Agreements. Interest rate swaps are subject to interest rate and credit risk. Total return swaps are subject to counterparty risk, which relate to credit risk of the counterparty and liquidity risk of the swaps themselves.

Equity Securities Risk - Investments in publicly issued equity securities and securities that provide exposure to equity securities, including common stocks, in general are subject to market risks that may cause their prices to fluctuate over time. Fluctuations in the value of equity securities in which the Fund invests will cause the Net Asset Value ("NAV") of the Fund to fluctuate.

Foreign Securities Risk - Investments in foreign securities and securities that provide exposure to foreign securities involve greater risks than investing in domestic securities. As a result, the Fund's returns and NAVs may be affected to a large degree by fluctuations in currency exchange rates, political, diplomatic or economic conditions and regulatory requirements in other countries. The laws and accounting, auditing, and financial reporting standards in foreign countries typically are not as strict as they are in the U.S., and there may be less public information available about foreign companies. These risks are more pronounced in emerging market countries, which are generally those with per capita income less than half that of the U.S.

Holding Cash Risk - The Fund may hold cash positions when the market is not producing returns greater than the short-term cash investments in which the Fund may invest. There is a risk that the sections of the market in which the Fund invests will begin to rise or fall rapidly and the Fund will not be able to sell stocks quickly enough to avoid losses, or reinvest its cash positions into areas of the advancing market quickly enough to capture the initial returns of changing market conditions.

Interest Rate Risk - The value of the Fund's investment in fixed income securities will fall when interest rates rise. The effect of increased interest rates is more pronounced for any intermediate-term or longer-term fixed income obligations owned by the Fund. Recently, interest rates have been historically low. Current conditions may result in a rise in interest rates, which in turn may result in a decline in the value of the fixed income investments held by the Fund. As a result, for the present, interest rate risk may be heightened.

Leverage Risk - The Fund may use leveraged investments that attempt to amplify the price movement of underlying securities or indices on a daily or other periodic basis, which may be considered aggressive. Such instruments may experience potentially dramatic price changes (losses), imperfect amplification and imperfect correlations between the price of the investment and the underlying security or index which will increase the volatility of the Fund and may involve a small investment of cash relative to the magnitude of the risk assumed. The use of leverage instruments may currently expose the Fund to additional risks that it would not be subject to if it invested directly in the securities underlying those derivatives. The use of leveraged instruments may result in larger losses or smaller gains than otherwise would be the case.

Market Risk - Overall investment market risks affect the value of the Fund. Factors such as economic growth and market conditions, interest rate levels, and political events affect the US and international investment markets. Additionally, unexpected local, regional or global events, such as war; acts of terrorism; financial, political or social disruptions; natural, environmental or man-made disasters; the spread of infectious illnesses or other public health issues (such as the global pandemic coronavirus disease 2019 (COVID-19)); and recessions and depressions could have a significant impact on the Fund and its investments and may impair market liquidity. Such events can cause investor fear, which can adversely affect the economies of nations, regions and the market in general, in ways that cannot necessarily be foreseen.

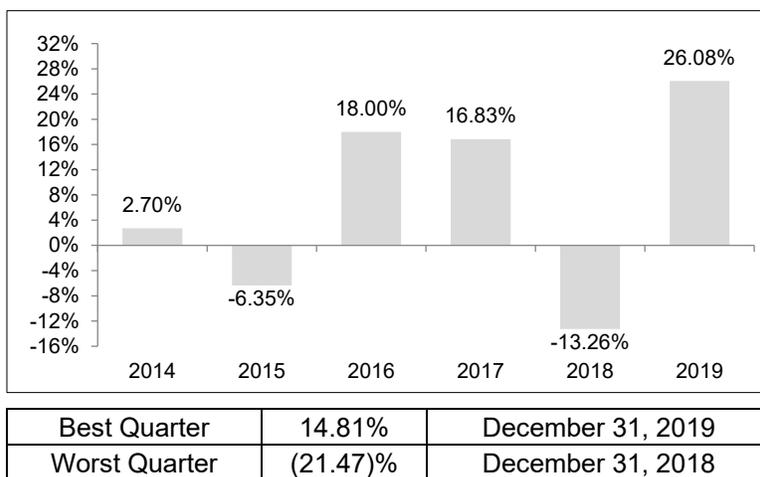

Risks of Investing in Other Investment Companies (including ETFs) - Investments in the securities of other investment companies, including ETFs, may involve duplication of advisory fees and certain other expenses. By investing in another investment company or ETF, the Fund becomes a shareholder thereof. As a result, Fund shareholders indirectly bear the Fund's proportionate share of the fees and expenses paid by shareholders of the other investment companies or ETFs, in addition to the fees and expenses Fund shareholders indirectly bear in connection with the Fund's own operations. If the other investment companies or ETFs fail to achieve their investment objectives, the value of the Fund's investment will decline, adversely affecting the Fund's performance. Leveraged ETFs will amplify gains and losses. Most leveraged ETFs "reset" daily. Due to the effect of compounding, their performance over longer periods of time can differ significantly from the performance of their underlying index or benchmark during the same period of time. In addition, closed-end investment company and ETF shares potentially may trade at a discount or a premium and are subject to brokerage and other trading costs, which could result in greater expenses to the Fund. Finally, because the value of other investment company or ETF shares depends on the demand in the market, the Adviser may not be able to liquidate the Fund's holdings in those shares at the most optimal time, adversely affecting the Fund's performance.

Shorting (Inverse) Risk - Short (inverse) positions are designed to profit from a decline in the price of particular securities, investments in securities or indices. The Fund will lose value if and when the instrument's price rises as result that is the opposite from traditional mutual funds. The Fund may also utilize inverse mutual funds and ETFs. These instruments seek to increase in value when their underlying securities or indices decline. Like leveraged investments, inverse positions may be considered aggressive. Inverse positions may also be leveraged. Such instruments may experience imperfect negative correlation between the price of the investment and the underlying security or index. The use of inverse instruments may expose the Fund to additional risks that it would not be subject to if it invested only in "long" positions.

Small- and Mid-Capitalization Companies Risk - Investing in the securities of small-capitalization and mid-capitalization companies involves greater risks and the possibility of greater price volatility than investing in larger capitalization and more-established companies. Investments in mid-cap companies involve less risk than investing in small-cap companies. Smaller companies may have limited operating history, product lines, and financial resources, and the securities of these companies may lack sufficient market liquidity. Mid-cap companies often have narrower markets and more limited managerial and financial resources than larger, more established companies.

Performance: The bar chart and performance table below show the variability of the Fund's returns, which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Fund's Investor Class shares for each full calendar year since the Fund's inception. The performance table compares the performance of the Fund's Investor Class shares over time to the performance of a broad-based market index. You should be aware that the Fund's past performance (before and after taxes) may not be an indication of how the Fund will perform in the future. Advisor Class shares have similar annual returns to Investor Class shares because the classes are invested in the same portfolio of securities, however, the returns for Advisor Class shares are lower than Investor Class shares because Advisor Class shares have higher expenses. Shareholder reports containing financial and performance information for the Fund will be mailed to shareholders semi-annually. Updated performance information is available at no cost by calling toll-free 1-855-64-QUANT (1-855-647-8268).

**Investor Class Performance Bar Chart
For Calendar Year Ended December 31**

The Fund's Investor Class year-to-date return as of September 30, 2020 was 12.52%.

**Performance Table
Average Annual Total Returns
(For periods ended December 31, 2019)**

Quantified Market Leaders Fund	One Year	Five Years	Since Inception ⁽¹⁾
Investor Class Shares Return before taxes	26.08%	7.09%	6.97%
Investor Class Shares Return after taxes on distributions	26.08%	4.67%	4.59%
Investor Class Shares Return after taxes on distributions and sale of Fund Shares ^{(2) (4)}	15.44%	4.41%	4.37%
Wilshire 5000 Index ⁽³⁾ <i>(reflects no deduction for fees, expenses or taxes)</i>	30.24%	10.97%	12.17% ⁽⁵⁾
Advisor Class Shares Return before taxes	25.51%	N/A	10.66%
Wilshire 5000 Index ⁽³⁾ <i>(reflects no deduction for fees, expenses or taxes)</i>	30.24%	10.97%	14.75% ⁽⁵⁾

- (1) The inception date of the Fund's Investor Class Shares is August 9, 2013. The inception date for the Advisor Class Shares is March 18, 2016.
- (2) After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.
- (3) The Wilshire 5000 Index is an unmanaged composite of equity securities of U.S. companies and includes the reinvestment of dividends. This index is widely used by professional investors as a performance benchmark for U.S. stocks. Investors cannot invest directly in an index.
- (4) After tax returns are only shown for Investor Class Shares. After Tax Return for Advisor Class Shares will vary.
- (5) The Wilshire 5000 index shown from inception dates of August 9, 2013 for Investor Class Shares, and March 18, 2013 for Advisor Class Shares.

Investment Adviser: Advisors Preferred, LLC

Subadviser: Flexible Plan Investments, Ltd.

Subadviser Portfolio Managers: Jerry C. Wagner, President of the Subadviser, has served the Fund as its portfolio manager since it commenced operations in 2013. Jason Teed, CFA, Director of Research of the Subadviser, has served the Fund as a portfolio manager since March 2018, and Timothy Hanna, CFS, CFIP, Senior Portfolio Manager of the Subadviser has served the Fund as a portfolio manager since 2019.

Purchase and Sale of Fund Shares: You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange is open for trading. You may purchase or redeem Fund shares by written request via mail (Quantified Market Leaders Fund, c/o Gemini Fund Services, LLC, P.O. Box 541150, Omaha, Nebraska 68154), by wire transfer, by telephone toll-free at 1-855-64-QUANT (1-855-647-8268), or through a financial intermediary. Purchases and redemptions by telephone are only permitted if you previously established these options on your account. IRAs are not eligible for telephone redemption privileges. The Fund accepts investments in the following minimum amounts:

Class	Account Type	Minimum Initial Investment	Minimum Subsequent Investment
Investor	Regular Account	\$10,000	\$1,000
Investor	Retirement Account	\$10,000	\$0
Advisor	Regular Account	\$10,000	\$1,000
Advisor	Retirement Account	\$10,000	\$0

The Fund, Adviser or Subadviser may waive any investment minimum.

Tax Information: Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan such as an IRA or 401(k) plan. However, these dividend and capital gain distributions may be taxable upon their eventual withdrawal from tax-deferred plans.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
