Before you invest, you want to review the Fund's complete prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund at <http://www.quantifiedfunds.com/fund-documents>. You can also get this information at no cost by calling 1-855-64-QUANT (1-855-647-8268), emailing orderquantifiedfunds@ultimusfundsolutions.com or by asking any financial intermediary that offers shares of the Fund. The Fund's prospectus, dated October 31, 2020, and statement of additional information, dated October 31, 2020, are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website or phone number noted above.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of each Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Funds' website www.advisorspreferred.com/fund-documents, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from each Fund electronically by contacting your financial intermediary (such as a broker-dealer or bank) or, if you are a direct investor, by following the instructions included with paper Fund documents that have been mailed to you. You may also elect to receive all future reports in paper free of charge.

Investment Objective: The Quantified Tactical Fixed Income Fund (the “Fund”) seeks total return.

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	Investor Class Shares
Management Fees	1.00%
Distribution and/or Service (12b-1) Fees	0.25%
Other Expenses ⁽¹⁾⁽²⁾	0.42%
Acquired Fund Fees and Expenses ⁽²⁾⁽³⁾	0.10%
Total Annual Fund Operating Expenses	1.77%

(1) Includes up to 0.15% for sub-transfer agent and sub-accounting fees.

(2) Estimated for initial fiscal period.

(3) The operating expenses in this fee table will not correlate to the expense ratio in the Fund’s financial highlights, when issued, because the financial statements include only the direct operating expenses incurred by the Fund and do not include the indirect costs of investing in other investment companies.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

Class	1 Year	3 Year	5 Year	10 Year
Investor	\$180	\$557	\$959	\$2,084

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. For the fiscal period September 13, 2019 (commencement of operations) ended June 30, 2020, the Fund’s portfolio turnover rate was 177% of the average value of its portfolio.

Principal Investment Strategies: The Fund’s investment adviser, Advisors Preferred, LLC (the “Adviser”), delegates execution of the Fund’s investment strategy to the subadviser, Flexible Plan Investments, Ltd. (“FPI” or the “Subadviser”). The Subadviser selects investments for the Fund and provides trade placement for fixed income instruments. The Adviser provides trade placement for non-fixed income instruments.

Under normal circumstances, the Fund invests at least 80% of its net assets (plus any borrowing for investment purposes) in fixed income securities. The Fund defines fixed income securities as debt instruments, exchange-traded funds (“ETFs”) and mutual funds that invest primarily in debt instruments, and futures and swap contracts on debt instruments. The Fund invests in ETFs and mutual funds that are not affiliated with the Adviser or Subadviser. The Fund invests primarily in US government debt and high-yield debt (commonly known as “junk bonds”), directly or through ETFs and mutual funds. The Fund also uses futures contracts and swaps on US government debt and high-yield debt as substitutes for debt instruments. The Fund invests in fixed income securities without any restriction on maturity or credit quality. The Fund may gain long or short exposure to fixed income securities by using inverse and/or leveraged ETFs and mutual funds (without restriction), regardless of whether they generate income or dividends. Short (inverse) positions are designed to profit from a decline in the price of particular securities, investments in securities or indices. The Fund employs inverse and short positions for hedging purposes or to capture returns in down markets. The Fund is non-diversified, which means it may invest a high percentage of its assets in a limited number of securities.

The Subadviser seeks interest income from debt instruments. Additionally, the Subadviser seeks capital gains by changing asset allocations between long positions in US government debt and high-yield debt as well as by utilizing short position exposure to US government debt. The Subadviser uses an aggressive tactical management strategy that typically results in high portfolio turnover. The Subadviser employs three investment models, which are driven by sub-strategies, to allocate assets and select long and short exposures. The sub-strategies are chosen and rebalanced quarterly using the Subadviser’s allocation algorithm to create a portfolio that aims for a balance of high return, low correlation, and low volatility. The Subadviser monitors the sub-strategies and may trade daily.

Principal Investment Risks: An investment in the Fund entails risks. The Fund could lose money, or its performance could trail that of other investment alternatives. Neither the Subadviser nor the Adviser can guarantee that the Fund will achieve its objective. It is important that investors closely review and understand these risks before making an investment in the Fund. Turbulence in financial markets and reduced liquidity in credit and fixed income markets could negatively affect issuers worldwide, including the Fund. There is the risk that you could lose all or a portion of your money on your investment in the Fund.

Subadviser's Investment Strategy Risk - While the Subadviser seeks to take advantage of investment opportunities for the Fund that will maximize its investment returns, there is no guarantee that such opportunities will ultimately benefit the Fund. The Subadviser will aggressively change the Fund's portfolio in response to market conditions that are unpredictable and may expose the Fund to greater market risk than other mutual funds. There is no assurance that the Subadviser's investment strategy will enable the Fund to achieve its investment objective.

Active and Frequent Trading Risk - The Fund may engage in active and frequent trading, leading to increased portfolio turnover, higher transaction costs, and the possibility of increased net realized capital gains, including net short-term capital gains that will be taxable to shareholders as ordinary income when distributed to them. The Subadviser's use of the Fund as an asset allocation tool for its other clients will increase the Fund's portfolio turnover.

Aggressive Investment Techniques Risk - The Fund uses investment techniques that may be considered aggressive. Risks associated with the use of futures and swaps include potentially dramatic price changes (losses) in the value of the instruments and imperfect correlations between the price of the contract and the underlying security or index. These instruments may increase the volatility of the Fund and may involve a small investment of cash relative to the magnitude of the risk assumed.

Counterparty Risk - The Fund may invest in financial instruments involving counterparties for the purpose of attempting to gain exposure to a particular group of securities or asset class without actually purchasing those securities or investments, or to hedge a position. These financial instruments may include swap agreements. The use of swap agreements involves risks that are different from those associated with ordinary portfolio securities transactions. For example, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. Swap agreements also may be considered to be illiquid. In addition, the Fund may enter into swap agreements that involve a limited number of counterparties, which may increase the Fund's exposure to counterparty credit risk. The Fund does not specifically limit its counterparty risk with respect to any single counterparty. Further, there is a risk that no suitable counterparties are willing to enter into, or continue to enter into, transactions with the Fund and, as a result, the Fund may not be able to achieve its investment objective.

Credit Risk - The Fund could lose money if the issuer or guarantor of a debt security goes bankrupt or is unable or unwilling to make interest payments and/or repay principal. The value of a debt security may decline if there are concerns about an issuer's ability or willingness to make interest and or principal payments. Changes in an issuer's financial strength or in an issuer's or debt security's credit rating also may affect a security's value and thus have an impact on Fund performance. The Fund considers all derivatives and non-U.S. Treasury debt instruments as subject to credit risk.

Derivatives Risk - The Fund uses investment techniques, investments in derivatives such as futures and swaps, which may be considered aggressive. Investments in such derivatives are subject to market risks that may cause their prices to fluctuate over time and may increase the volatility of the Fund. The use of derivatives may expose the Fund to additional risks that it would not be subject to if it invested directly in the securities underlying those derivatives, such as counterparty risk and the risk that the derivatives may become illiquid. The use of derivatives may result in larger losses or smaller gains than otherwise would be the case. In addition, the Fund's investments in derivatives currently are subject to the following risks:

Futures Contracts Risk. There may be an imperfect correlation between the changes in market value of the securities held by the Fund and the prices of futures contracts. There may not be a liquid secondary market for the futures contracts. If the Fund uses futures as hedging instrument at the wrong time or judges the market conditions incorrectly, the hedge might be unsuccessful, reduce the Fund's investment return, or create a loss.

Hedging Risk. If the Fund uses a hedging instrument at the wrong time or judges the market conditions incorrectly, the hedge might be unsuccessful, reduce the Fund's investment return, or create a loss.

Swap Agreements. Interest rate swaps are subject to interest rate and credit risk. Total return swaps are subject to counterparty risk, which relates to credit risk of the counterparty and liquidity risk of the swaps themselves.

Financial Sector Risk - Performance of companies in the financial sector may be adversely impacted by higher borrower default rates, changes in interest rates, leverage, and increased government regulation.

Holding Cash Risk - The Fund may hold cash positions when the market is not producing returns greater than the short-term cash investments in which the Fund may invest. There is a risk that the sections of the market in which the Fund invests will begin to rise or fall rapidly and the Fund will not be able to sell stocks quickly enough to avoid losses, or reinvest its cash positions into areas of the advancing market quickly enough to capture the initial returns of changing market conditions.

Interest Rate Risk - The value of the Fund's investment in fixed income securities will fall when interest rates rise. The effect of increased interest rates is more pronounced for any intermediate-term or longer-term fixed income obligations owned by the Fund. Recently, interest rates have been historically low. Current conditions may result in a rise in interest rates, which in turn may result in a decline in the value of the fixed income investments held by the Fund. As a result, for the present, interest rate risk may be heightened.

Leverage Risk - The Fund may use leveraged investments that attempt to amplify the price movement of underlying securities or indices on a daily or other periodic basis, which may be considered aggressive. Such instruments may experience potentially dramatic price changes (losses), imperfect amplification, and imperfect correlations between the price of the investment and the underlying security or index which will increase the volatility of the Fund and may involve a small investment of cash relative to the magnitude of the risk assumed. The use of leveraged instruments may currently expose the Fund to additional risks that it would not be subject to if it invested directly in the securities underlying those derivatives. The use of leveraged instruments may result in larger losses or smaller gains than otherwise would be the case. Most leveraged ETFs "reset" daily and, therefore, due to the effect of compounding, their performance over longer periods of time can differ significantly from the performance of their underlying index or benchmark during the same period of time.

Limited History of Operations Risk - The Fund has limited history of operations for investors to evaluate. The Fund may fail to attract sufficient assets to operate efficiently.

Lower-Quality Debt Securities Risk - The Fund will invest a significant portion of its assets in securities rated below investment grade or "junk bonds." Junk bonds may be sensitive to economic changes, political changes, or adverse developments specific to a company. These securities are considered speculative and generally involve greater risk of default or price changes than other types of fixed-income securities and the Fund's performance may vary significantly as a result.

Market Risk - Overall investment market risks affect the value of the Fund. Factors such as economic growth and market conditions, interest rate levels, and political events affect the US and international investment markets. Additionally, unexpected local, regional or global events, such as war; acts of terrorism; financial, political or social disruptions; natural, environmental or man-made disasters; the spread of infectious illnesses or other public health issues (such as the global pandemic coronavirus disease 2019 (COVID-19)); and recessions and depressions could have a significant impact on the Fund and its investments and may impair market liquidity. Such events can cause investor fear, which can adversely affect the economies of nations, regions and the market in general, in ways that cannot necessarily be foreseen.

Non-Diversification Risk - The Fund is non-diversified, which means it invests a high percentage of its assets in a limited number of securities. A non-diversified fund's net asset values ("NAVs") and total returns may fluctuate more or fall greater in times of weaker markets than a diversified mutual fund.

Risks of Investing in Other Investment Companies - Investments in the securities of other investment companies, (ETFs and mutual funds) may involve duplication of advisory fees and certain other expenses. By investing in another investment company, the Fund becomes a shareholder thereof. As a result, Fund shareholders indirectly bear the Fund's proportionate share of the fees and expenses paid by shareholders of the other investment companies, in addition to the fees and expenses Fund shareholders indirectly bear in connection with the Fund's own operations. If the other investment companies fail to achieve their investment objectives, the value of the Fund's investment will decline, adversely affecting the Fund's performance. Leveraged ETFs and mutual funds will amplify gains and losses. Most leveraged ETFs and mutual funds "reset" daily and, therefore, due to the effect of compounding, their performance over longer periods of time can differ significantly from the performance of their underlying index or benchmark during the same period of time. In addition, ETF shares potentially may trade at a discount or a premium to net asset value and are subject to brokerage and other trading costs, which could result in greater expenses to the Fund. Finally, because the value of ETF shares depends on the demand in the market, the Subadviser may not be able to liquidate the Fund's holdings in those shares at the most optimal time, adversely affecting the Fund's performance.

Shorting (Inverse) Risk - Short (inverse) positions are designed to profit from a decline in the price of particular securities, investments in securities or indices. The Fund will lose value if and when the instrument's price rises – a result that is the opposite from traditional mutual funds. The Fund may also utilize inverse mutual funds and ETFs. These instruments seek to increase in value when their underlying securities or indices decline. Like leveraged investments, inverse positions may be considered aggressive. Inverse positions may also be leveraged. Such instruments may experience imperfect negative correlation between the price of the investment and the underlying security or index. The use of inverse instruments may expose the Fund to additional risks that it would not be subject to if it invested only in "long" positions.

Performance: Because the Fund has less than a full calendar year of investment operations, no performance information is presented for the Fund at this time. In the future, performance information will be presented in this section of the Prospectus. Also, shareholder reports containing financial and performance information will be mailed to shareholders semi-annually. Updated performance information and daily NAV per share will be available at no cost by calling toll-free 1-855-64-QUANT (1-855-647-8268).

Investment Adviser: Advisors Preferred, LLC.

Subadviser: Flexible Plan Investments, Ltd.

Subadviser Portfolio Managers: Jerry C. Wagner, President of the Subadviser, Jason Teed, CFA, Director of research of the Subadviser, and Timothy Hanna, CFA, CFIP, Senior Portfolio Manager of the Subadviser have served the Fund as its portfolio managers since it commenced operations in 2019.

Purchase and Sale of Fund Shares: You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange is open for trading. You may purchase or redeem Fund shares by written request via mail Quantified Tactical Fixed Income Fund, c/o Gemini Fund Services, LLC, P.O. Box 541150, Omaha, Nebraska 68154), by wire transfer, by telephone toll-free at 1-855-64-QUANT (1-855-647-8268), or through a financial intermediary. Purchases and redemptions by telephone are only permitted if you previously established these options on your account. IRAs are not eligible for telephone redemption privileges. The Fund accepts investments in the following minimum amounts:

Class	Account Type	Minimum Initial Investment	Minimum Subsequent Investment
Investor	Regular Account	\$10,000	\$1,000
Investor	Retirement Account	\$10,000	\$0

The Fund, Adviser or Subadviser may waive any investment minimum.

Tax Information: Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan such as an IRA or 401(k) plan. However, these dividend and capital gain distributions may be taxable upon their eventual withdrawal from tax-deferred plans.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
