Data shows past performance, which is not indicative of future performance. Current performance may be lower or higher than the data quoted. For the most recent month-end performance data, visit grandeurpeakglobal.com. Investment returns and principal value will fluctuate and shares, when redeemed, may be worth more or less than their original cost. The Advisor may absorb certain Fund expenses, without which total return would have been lower. Net Expense Ratio reflect the expense waiver, if any, contractually agreed to through September 1, 2025. A 2% redemption fee will be deducted on fund shares held 60 days or less. Performance data does not reflect this redemption fee or taxes.

Holdings | As of January 31, 2025³

¹ The MSCI ACWI Small Cap Index is designed to measure the equity market performance of small-cap companies across developed and emerging markets globally.

² Morningstar Global Small/Mid Stock portfolios invest in a variety of international stocks that are smaller. World-stock portfolios have few geographical limitations. It is common for these portfolios to invest the majority of their assets in developed markets, with the remainder divided among the globe's smaller markets. These portfolios are not significantly overweight U.S. equity exposure relative to the Morningstar Global Market Index and maintain at least a 20% absolute U.S. exposure.

³ Holdings are released based on a 60-day lag from the most recent quarter end according to the Grandeur Peak Holdings Release Policy. Portfolio holdings are subject to change at any time. References to specific securities should not be construed as recommendations by the Fund or its Advisor. Current and future holdings are subject to risk. Total amount subject to rounding.

1 Gross of fees and expenses.

2 Allocation Effect measures how well a manager generates returns based on allocations to specific sectors, industries, geographies, or market caps in a portfolio relative to a benchmark.

3 Selection Effect measures how well a manager generates returns based on individual stock selection in a portfolio relative to a benchmark.

4 Interaction Effect measures the impact of both Allocation and Selection in a portfolio's weighting relative to a benchmark.

5 Currency Effect measures the difference between the total currency effect less the local currency effect on a portfolio's return relative to a benchmark.

6 Benchmark: MSCI ACWI Small Cap Index. You cannot invest directly in this or any index.

An investor should consider investment objectives, risks, charges, and expenses carefully before investing. To obtain a prospectus, containing this and other information, visit grandeurpeakglobal.com or call 1-855-377-PEAK (7325). Please read it carefully before investing.

Mutual fund investing involves risks and loss of principal is possible. Investing in small and micro-cap funds will be more volatile, and loss of principal could be greater than investing in large cap or more diversified funds. Investing in foreign securities entails special risks, such as currency fluctuations and political uncertainties, which are described in more detail in the prospectus. Investments in emerging markets are subject to the same risks as other foreign securities and may be subject to greater risks than investments in foreign countries with more established economies and securities markets. Diversification does not eliminate the risk of experiencing investment loss.

MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used to create indices or financial products. You cannot invest directly in any index.
