What were the Fund's costs for the year?

(based on a hypothetical \$10,000 investment)

Class Name	Cost of a 10k Investment	Cost Paid as a % of a 10k Investment
A	\$224.61	2.24%

How did the Fund perform last year?

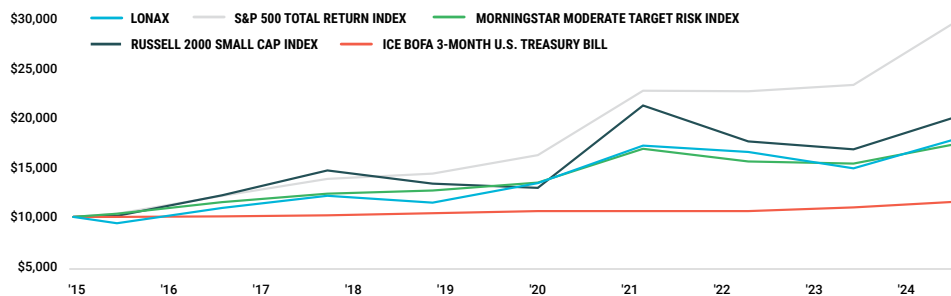

A combination of trend following and active risk management allowed the Fund to gain exposure to the rise in equities. Now that the market has rallied further, the fund is well positioned to benefit from any further small and mid-cap momentum as the Fund ended the year with a portfolio more concentrated in quality small and mid-cap companies.

Even with uncertainty in the markets, the Fund performed in line with expectations. The Fund's focus on active risk management has helped mitigate risks. As a result, investors can remain confident in the Fund's ability to navigate different market cycles while capitalizing on emerging opportunities.

How has the Fund performed since its inception?

The Fund has performed consistently against its primary benchmark, the Morningstar Moderate Target Risk Index, and its secondary benchmark, the Russell 2000 Small Cap Index. 2023 marked the importance of staying invested through market cycles. The long-term outlook of the strategy helps LONGX capture returns over a full market cycle.

Total Return Based on a \$10,000 Investment
